Opal will work with ALL Lightroom presets (it'd be pretty silly if it only worked with my own, right?). In fact, the way Opal is designed, it works really really well with lots of kinds of presets (in situations that another opacity plugin doesn't).

OPAL - The (crazy good) Opacity Slider for Lightroom Presets

Try closing all other open applications that might have previously used the clipboard, such as MS Word. Cheers.

This is a list of file formats used by computers, organized by type. Filename extensions are usually noted in parentheses if they differ from the file format name or abbreviation. Many operating systems do not limit filenames to one extension shorter than 4 characters, as was common with some operating systems that supported the File Allocation Table (FAT) file system.
