

bifurcations and chaos in pdf

The logistic map is a polynomial mapping (equivalently, recurrence relation) of degree 2, often cited as an archetypal example of how complex, chaotic behaviour can arise from very simple non-linear dynamical equations. The map was popularized in a 1976 paper by the biologist Robert May, in part as a discrete-time demographic model analogous to the logistic equation first created by Pierre ...

Logistic map - Wikipedia

In the mathematical area of bifurcation theory a saddle-node bifurcation, tangential bifurcation or fold bifurcation is a local bifurcation in which two fixed points (or equilibria) of a dynamical system collide and annihilate each other. The term 'saddle-node bifurcation' is most often used in reference to continuous dynamical systems. In discrete dynamical systems, the same bifurcation is ...

Saddle-node bifurcation - Wikipedia

Official quarterly research journal of the Society for Chaos Theory in Psychology & Life Sciences since 1997. NDPLS publishes original theory and empirical research on attractors, bifurcations, chaos, fractals, solitons, catastrophes, self-organization processes and emergence, power law distributions, cellular automata, agent-based models, genetic algorithms, agent-based models, social and ...

Nonlinear Dynamics, Psychology, and Life Sciences

Eine Bifurkation oder Verzweigung ist eine qualitative Zustandsänderung in nichtlinearen Systemen unter Einfluss eines Parameters. Der Begriff der Bifurkation wurde von Henri Poincaré eingeführt. Nichtlineare Systeme, deren Verhalten von einem Parameter abhängt, können bei einer Änderung des Parameters ihr Verhalten plötzlich ändern.

Nonlinear Dynamics provides a forum for the rapid publication of original research in the developing field of nonlinear dynamics. The scope of the journal encompasses all nonlinear dynamic phenomena associated with mechanical, structural, civil, aeronautical, ocean, electrical and control systems.

Nonlinear Dynamics - incl. option to publish open access

En mathématiques, la théorie du chaos étudie le comportement des systèmes dynamiques très sensibles aux conditions initiales, un phénomène généralement illustré par l'effet papillon. Pour de tels systèmes des différences infimes dans les conditions initiales entraînent des résultats totalement différents, rendant en général toute prédiction impossible à long terme.

Théorie du chaos - Wikipedia

Il est assez rare de voir un entrepreneur défendre la notion de bien commun. C'est pourtant ce que fait Philippe Derudder dans son dernier livre intitulé « Une monnaie au service du Bien commun (Conditions Yves Michel).

2 Non-linear difference equations In a linear difference equation, every term of the equation contains at most one of the elements of the sequence f_n and the elements occur only as themselves" i.e. they are not raised to any power (other than one) and are not an argument to a function.

There really is no single list of the best power supply books because what is best depends on the judgement-criteria the list-maker uses. I have my favorites, but they may not be yours. You will find this list is heavily weighted to books concentrating on power supply design, rather than general power electronics text books, which tend to have a lot of content on devices, motor drives, etc ...

Water vapor feedback is way more complicated than most people think. It is only partly understood and a dynamic process. Like most, if not all natural processes or dynamic systems, they are always tending or

trending to some kind of equilibrium; however, that equilibrium is a continually moving target.

Five Reasons Why Water Vapor Feedback Might Not Be

The Chozizo Syndrome [anarchist "robotic controversy"] incarnations of Thoreau (1) and Proudhon (2), one facing his political isolation to re-discover a monist (3) relationship, the other promoting the success of a bottom up urban social contract (4) in which they have both participated in the past, sharing their protest, illusions and utopian ideals on the barricade.
