CHAPTER 1 Basic Definitions and Results Rings A ring is a set R with two binary operations \cdot and $+$ such that (a) $(R, +)$ is a commutative group; (b) \cdot is associative, and there exists $1 \in R$ such that $a \cdot 1 = a = 1 \cdot a$ for all $a \in R$.

The Journal of Algebra is a leading international journal and publishes papers that demonstrate high quality research results in algebra and related computational aspects. Only the very best and most interesting papers are to be considered for publication in the journal. With this in mind, it is important that the contribution offer a substantial result that will have a lasting effect upon the ...

The Fields Medal is a prize awarded to two, three, or four mathematicians under 40 years of age at the International Congress of the International Mathematical Union (IMU), a meeting that takes place every four years.. The Fields Medal is regarded as one of the highest honors a mathematician can receive, and has been described as the mathematician's "Nobel Prize" , although there are several ...

In number theory, the ideal class group (or class group) of an algebraic number field K is the quotient group J/P where J is the group of fractional ideals of the ring of integers of K , and P is its subgroup of principal ideals. The class group is a measure of the extent to which unique factorization fails in the ring of integers of K . The order of the group, which is finite, is called ...
