Molecular biology / m ɛ™ ɛˆ | ɛˆ k j ɛš | ɛ™r / is a branch of biology that concerns the molecular basis of biological activity between biomolecules in the various systems of a cell, including the interactions between DNA, RNA, proteins and their biosynthesis, as well as the regulation of these interactions. Writing in Nature in 1961, William Astbury described molecular biology as:

### **Molecular biology - Wikipedia**

Cell biology (also called cytology, from the Greek κύτος, kytos, "vessel") is a branch of biology that studies the structure and function of the cell, which is the basic unit of life. Cell biology is concerned with the physiological properties, metabolic processes, signaling pathways, life cycle, chemical composition and interactions of the cell with their environment.

### **Cell biology - Wikipedia**

The definitive text in cell biology. As the amount of information in biology expands dramatically, it becomes increasingly important for textbooks to distill this vast amount of scientific knowledge into concise principles and enduring concepts.

Mobilizing the immune system via blockade of immune cell inhibitory pathways is revolutionizing oncology clinical practice. Multiple monotherapy agents have been approved and combination therapies are in development. This review discusses key intracellular pathways where development of small-molecule therapeutics is attractive, tractable, and synergistic with biologic-mediated checkpoint blockade.

Keystone Symposia, a non-profit organization dedicated to connecting the scientific community for the benefit of the world community and accelerating life science discovery, conducts scientific conferences on biomedical and life science topics in relaxing environments that catalyze information exchange and networking. Meetings are designed to encourage scientists to discuss the newest ideas ...

Stem Cell Research is dedicated to publishing high-quality manuscripts focusing on the biology and applications of stem cell research. Submissions to Stem Cell Research, may cover all aspects of stem cells, including embryonic stem cells, tissue-specific stem cells, cancerstem cells, developmental studies, genomics and translational research. Special focus of SCR is on mechanisms of ...
