Algebraic number theory is a branch of number theory that uses the techniques of abstract algebra to study the integers, rational numbers, and their generalizations. Number-theoretic questions are expressed in terms of properties of algebraic objects such as algebraic number fields and their rings of integers, finite fields, and function fields. These properties, such as whether a ring admits ...

In mathematics, the Gauss class number problem (for imaginary quadratic fields), as usually understood, is to provide for each  $n \neq 1$  a complete list of imaginary quadratic fields (for negative integers  $d$ ) having class number  $n$ . It is named after Carl Friedrich Gauss. It can also be stated in terms of discriminants. There are related questions for real quadratic fields and for the behavior as

There are a few points to make. The modulus operator finds the remainder after an integer divide. The print command output a floating point number on the divide, but an integer for the rest. The string concatenate operator is confusing, since it isn't even visible.

Hi, I am new to PDF fillable form universe so I'm a little lost. I have an Excel spreadsheet where I have simple data and I would like to create this PDF form where in the first column the user types an item code and the other fields get automatically filled in, you can easily do this in Excel with a Vlookup.
